

최종 그룹 프로젝트 수행 가이드라인: 첫번째+두번째

AI+X: Deep Learning

중요 제출 일: (제출 날짜는 추후 조정될 수 있습니다.)

A. Report your group	- Apr. 28	*Update google spreadsheet*
B. Report your topic and blog	- May. 19	*Update google spreadsheet*
C. Blog in progress	- June. 2	*Submit LMS online*
D. Final blog	- June 9, 23:59	*Submit LMS online*

****Task 1:** Report your group members (2 to 4 people).

Possible blog sites:

<https://www.notion.so>
<https://www.medium.com>
<https://www.github.com> or any other tech blog/blogging sites.

Tech blog samples:

<https://www.kaggle.com/mrisdal/exploring-survival-on-the-titanic/report>
<https://towardsdatascience.com/category/artificial-intelligence/deep-learning/>
<https://huggingface.co/blog>
<https://research.google/blog/>
<https://engineering.fb.com/category/ml-applications/>

우리 비디오 예제와 같은 스타일

****Task 2:** Set up your blog space for the final project. Of course, your blog should be written in Korean (For some of you, if you want to do in English, please let me know separately). This is where you will be writing about your final projects. Go to the following spreadsheet and report your group members and blog address.

AI+X-Deep Learning-Projects-2026-Spring:

https://docs.google.com/spreadsheets/d/19cS16W3ZHbmTANC2eZKFZBsNCgBDTK6Lx-meOSEI_1M/edit?usp=sharing

When you choose your topic to work on, you can choose one of the following options:

Option A: Take a very similar step like Kaggle's Titanic example, you will show us how to investigate the dataset of your choice. You can choose one of the methods from the AI/Machine learning/DL libraries (e.g., <https://scikit-learn.org/stable/>, R - <https://cran.r-project.org/web/views/MachineLearning.html>, Any neural network packages, AWS resources <https://docs.aws.amazon.com/sagemaker/latest/dg/algos.html> <https://github.com/aws/amazon-sagemaker-examples>, huggingface, keras/pytorch samples, and others). You will show us a step-by-step procedure on how to apply AIML techniques. Accuracy of your method does not matter in this project.

Option B: You will choose one of the methods (ML, DL algorithms), summarize its history, collect related work (URL, articles, publications), and explain as much as possible in words with appropriate diagrams. You are writing an article about the algorithm of your choice. Scikit-learn and R websites would be great resources for choosing your method to explain. For example, if you choose to explain ‘Random Forest’, then collect the related documents/websites, summarize/present them nicely, and explain in your own words with graphs/diagrams. However, try to avoid broad topics like ‘Neural Networks’ or commonly used packages.

The key idea is to present the analysis method nicely to the public.

You can choose either Option A or B. Do not try both approaches.

****수업시간에 보았던 SK AI Fellowship 프로젝트 예제로 참고하셔도 좋습니다.**

****Task 3:** Make your tech blog using the contents. At the top of your blog, you should have a table of contents (short). The recommended format is the following:

(추천 양식 샘플입니다, 다른 방식으로 하셔도 상관없습니다)

Title:

Members: Name1, Department, Email
Name2, Department, Email ...
Name3, Department, Email ...

I. Proposal (Option 1 or 2) – **This should be filled by sometime in early May.**

- Motivation: Why are you doing this?
- What do you want to see at the end?

II. Datasets

- Describing your dataset

III. Methodology

- Explaining your choice of algorithms (methods)
- Explaining features (if any)

IV. Evaluation & Analysis

- Graphs, tables, any statistics (if any)

V. Related Work (e.g., existing studies)

- Tools, libraries, blogs, or any documentation that you have used to do this project.

VI. Conclusion: Discussion

주제 변경은 최종제출일 2주전까지 가능합니다. 되도록 변경없이 진행하시면 좋습니다.

(B 데드라인 이후 구글 스프레드 문서 학생들 수정 권한이 막힐 겁니다.

변경사항 카톡으로 말씀 주시면, 제가 직접 반영할 겁니다.)

****Task 4:** Video or Sound recording via YouTube or others. You will be recording video or sound of explaining your tech blog contents and demo (if any). The length should be around **5-10 minutes**, do not make it too long. It will be something like our weekly video or you can simply record your voice only. You can show any coding screen or scrolling up/down your blog or whatever you felt it's necessary. **DO NOT** make a separate presentation file. Upload to YouTube (or any other similar services) and share the link in your tech blog. In essence, it will be your presentation to me.

Table of contents ...

Video/Audio link (embedded if possible): www.sample.com/sample

****Task 5:** Describe who did what in your group project (In conclusion section, perhaps). For example,

Member 1: code implementation (if any)

Member 2: dataset processing

Member 3: write up, graph analysis, YouTube recording

Submission details:

For A & B. 공유 된 구글 스프레드 문서에 들어가서 작성하시길 바랍니다.

For B. Submit (PDF) a copy of your **blog in progress** and submit online.
(그룹 멤버 중 한 명만 대표로 제출하시면 됩니다.)

For C. Submit (PDF) a copy of your **final blog** and submit it online. A full version should be done by this time. (그룹 멤버 중 한 명만 대표로 제출하시면 됩니다.)
